

SPENCER DIXON

RESUME

WORK EXPERIENCE:

2013 / Present – Design Contracting

Working solo for clients like Artemis Health, CityGro, and others. User testing, high fidelity mocks, interaction design, handoff, etc.

2015 / Present – ExpertVoice (formerly Experticity)

Interactive Designer

Working as part of a design team to accomplish goals of the client but also of the in-house agency. Handling many concurrent, high profile projects. Design, user testing, development and presentation of web components and digital stories.

2018 / Present – thecampus.market

My friends and I created a service that allows students to buy and sell housing contracts on a private marketplace. It started as an excuse to hang out and has turned into something that a decent amount of people use. I have handled all of the design, except for the terrible logo.

EDUCATION:

2013 / 2015 – University of Utah, Incomplete

College of Architecture and Design, Multi-Disciplinary Design Major

I strongly believe in continued self-improvement through education. If there exists in your organization, an arbitrary requirement for a college degree, please remove me from your list of candidates.

STRENGTHS:

Learning, listening, layouts, alliteration, problem solving, HTML, CSS, JQuery, CMS/LMS systems, survey science and data mapping, design thinking, ping pong, automation, process development, brevity.
